Professional Summary

Motivated Computer Science graduate with expertise in front-end and full-stack development. Skilled in building scalable web applications, integrating APIs, and solving complex problems. Proficient in data analysis and visualization, with a focus on creating user-friendly systems that drive efficiency and innovation.

Education

B.Sc. in Computer Science, University of Jordan 2022 – 2026
GPA: Very Good

Experience

Mendix Rapid Developer – Trainee Nov 2025 – Jan 2026
Polaris

- Developed and customized low-code applications using the Mendix platform.
- Designed and implemented business workflows, user interfaces, and data models to support application requirements.
- Collaborated with cross-functional teams to analyze business needs and deliver efficient digital solutions.
- Worked with microflows, page design, and database entities to improve application functionality and user experience.
- Participated in testing, debugging, and optimizing applications to ensure performance and reliability.

Digiskills MEL Appearance Apr 2026 – Jun 2026
Integrated International

- Trained on MEL theories, best practices, data collection methodologies, and advanced data automation techniques, with a focus on optimizing MEL systems for program effectiveness.
- Designed and implemented digital surveys using XLSForm, KoboToolbox, and Google Forms to support structured and efficient data collection.
- Applied sampling methods to ensure data quality and representativeness.
- Utilized Excel for data cleaning, transformation and analysis including formulas, power query and pivot table.
- Explored practical applications of prompt engineering to enhance workflows and improve efficiency in data related tasks.

Full Stack Web Development Trainee (.NET / Angular) Jul 2026 – Present
Dalil

- Database Management & Modeling: Gaining hands-on experience in designing, querying, and managing relational databases using PostgreSQL, with a focus on data modeling and optimization.
- .NET Ecosystem & Backend Development: Developing backend services using C#, ASP.NET Core, and Object-Oriented Programming (OOP) principles.

- Frontend Development with Angular: Building dynamic and responsive user interfaces using Angular, working with components, services, and reactive programming.
- API Integration & Full-Stack Workflow: Developing and consuming RESTful APIs to integrate Angular frontend applications with .NET backend services.
- Version Control & Collaboration: Using Git and GitHub while following industry-standard practices for version control and collaborative software development.

Certifications

- | | |
|---|------|
| • Full Stack Development , UDEMY | 2026 |
| • Cloud Foundations , AWS Academy Graduate | 2025 |
| • Generative AI Foundations , AWS Academy Graduate | 2025 |

Technical Skills

Web Development: HTML, CSS, JavaScript, React.js, Node.js, PHP, ASP.NET Core

Programming Languages: C++, Java, Python , C#

Databases: SQL, NoSQL , PostgreSQL

Tools: Git, GitHub, Excel (Advanced), Power BI

Projects

- [**Life Bank System**](#) Developed a full-stack blood donation management system using HTML, CSS, JavaScript, PHP, and MySQL. Implemented features such as request handling, donation tracking, and an admin dashboard.
- **Clock Simulation Project**
Built a clock simulation program using C++ and circular doubly linked lists. The project supports setting and updating time, displaying numbers in normal and Roman numeral formats, and handling AM/PM time changes using object-oriented programming concepts and linked list.
